

The *Essentials* training is aimed at personnel who are new to Foundation Fieldbus (FF) but are familiar with legacy Instrumentation concepts. Personnel who need to attend are staff who would have any technical involvement with the Engineering, Procurement & Construction (EPC) of a FF installation.

Included with the course is a full-colour comprehensive FF reference manual (135 pages). The one-day workshop covers many aspects of Fieldbus technology, including FF segment installation issues and specialised networking terminology.

The course material contains sections on : -

- Foundation - Goals, Principles & Philosophy
- Fieldbus Technology, OSI Model & Benefits
- Fieldbus Wiring & Installation
- Device Types and Communications
- FB Communication Models & the Macrocycle
- User Layer Function Blocks & Schedules

The course is certified by the Fieldbus Foundation and was created by the Southern Alberta Institute of Technology (SAIT) in Calgary, Canada. This *Essentials* training is a pre-requisite to the higher levels of *Discovery* and *Systems Integrator* which are also offered by SAIT. All the local Instructors are fully certified by both the Fieldbus Foundation and SAIT to present the training courses.

Perth

Melbourne

Brisbane

The courses normally run from 09:00 to 16:30
lunch and break refreshments are included with the course fee
